Baby Floki – BSC
0x71e80e96af604afc23ca2aed4c1c7466db6dd0c4
Total Supply – 1,000,000,000,000
Contract Link - https://bscscan.com/address/0x71e80e96af604afc23ca2aed4c1c7466db6dd0c
Compiler version – v0.8.4+commit.c7e474f2
Optimization Enabled – Yes, 200 runs
Start block – 10916178
Contract deployer's address – 0x77fdb8852f06a7680f647a2822f7c7b4a0d458e8
Security Issues:
occurry issues.
High severity: None
Modium soverity:

Low severity:

None

Tax fees for marketing, reflection and liquidity could be changed by contract owner.

Issue Checking Status:

1. Compiler errors: Passed

2. Race conditions/Reentrancy: Passed

3. Possible delays in data delivery: Passed

4. Front running vulnerability: Passed

5. Timestamp dependence: Passed

6. Integer Overflow and Underflow: Passed

7. DoS with revert: Passed

8. DoS with blocklimit: Passed

9. Methods execution platform: Passed

10. Economy model of smart contract: Passed

11. Impact and exchange rate of logic: Passed

12. Private user data leaks: Passed

13. Malicious event log: Passed

14. Hidden malicious functions: Passed

15. Scoping and declaration: Passed

16. Uninitialized storage pointers: Passed

17. Arithmetic accuracy: Passed

19. Design logic: Passed

19. Cross-fall race conditions: Passed

20. Proper openzeppelin contract implementation and usage: Passed

21. Fallback function safety: Passed

What was the thought process behind the Baby Floki smart contract? Why this contract over any other?

Since it was going to be a fair launch, our priority was to have anti-snipe features in the contract to ensure a smooth launch with minimum bot impact, which was successfully achieved. Other features were added as well such as the max wallet and max transaction limits to have a better spread in terms of wallet sizes. As a doge token, we decided on having our rewards distributed to holders in Dogecoin as because it is the leading memecoin in terms of popularity and market cap.

Is your team renouncing ownership? Explain why or why not, and how it would be beneficial.

Ownership will not be renounced for several reasons. First, it gives the team the freedom to modify the %s of the transaction taxes going to holders, liquidity and marketing as the team sees fit for the benefit of the token, for example having rewards increased for special milestones or increasing the liquidity % to maintain it at a healthy level. Other reasons for not renouncing ownership is to be able to edit minor details in the contract if audits/exchanges require, while also have room for development in the future.

Does your team have experience within the DeFi environment? Are you prepared to run this project diligently?

The team have a significant amount of experience in running and leading successful projects. The vast majority of services of the token's everyday life are done in-house, with every team member contributing in his own field of expertise. However, we have a reliable network of partners who we outsource additionally required services to.

Please explain your team's choices in distributing Baby Floki upon launch and how you believe it will be beneficial to the project.

Team wallets in total are a max of 10.5% for this fair launch. Four of these are dev wallets (6% in total) and the remaining three are for exchanges and promotions. The team members are the first to invest in this project with their time and resources, we believe having the top wallets within the team is healthy and helps keep the token stable, in addition to having a lot to look forward to as an incentive for the token's growth.
